

Squad Criteria and Expectations

Squad Movement Guidelines

Swimmers will be selected using the coaching team's discretion. Selection typically takes place for each term but swimmers might be asked to move squad during a term.

Selections will not be based on times. This will allow swimmers to focus on technique and to have a longer career in swimming, achieving better long-term results

Most squad movements will be based on a combination of age, performance, ability to train, attendance, attitude and technique, not age or performance alone. Movement within the Academy squads will be particularly fluid. Promotions will be coordinated between swimmer, parents and coaching staff at a time most beneficial for the individual.

All members are expected to adhere to the code of conduct which they have signed on joining the club.
